SUMMARY

Backend Developer with 3+ years building scalable REST APIs and microservices for high-traffic applications. Strong in system design, database optimization, and cloud deployment.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript (Node.js), SQL

Frameworks: Spring Boot, Express.js, Django

Databases: PostgreSQL, MongoDB, Redis

Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, Kubernetes, Jenkins CI/CD

Messaging & Architecture: RabbitMQ, Kafka, Microservices, REST, gRPC

PROFESSIONAL EXPERIENCE

Backend Developer — Finlytics Systems

Bengaluru, India | Jun 2023 – Present

- Designed and maintained 15+ REST APIs serving 200K+ daily requests using Spring Boot and PostgreSQL.
- Migrated a monolithic billing service into 4 independent microservices, reducing deployment time by 60%.
- Implemented Redis caching layer that cut average API response time from 480ms to 120ms.
- Set up CI/CD pipelines with Jenkins and Docker, enabling zero-downtime deployments.

Software Engineer Intern — CloudNine Technologies

Chennai, India | Jan 2023 – May 2023

- Built internal inventory-management API in Node.js/Express with MongoDB.
- Wrote integration tests achieving 85% code coverage using Jest and Supertest.

PROJECTS

Job Queue Service — Built a distributed task-queue system with RabbitMQ and Node.js supporting retry logic and dead-letter queues.

URL Shortener API — Designed a high-throughput URL shortening service using Spring Boot, Redis, and PostgreSQL, deployed on AWS EC2.

EDUCATION

B.E. Computer Science, Anna University, Chennai — 2023 | CGPA: 8.4/10
